

Concertina Stage™

TELESCOPIC RISER SYSTEM

husseyseating™

YOUR PARTNER FOR SEATING SOLUTIONS

It's Showtime in No Time Introducing the Concertina Stage™

Push a button and minutes later, your stage is set for success. This breakthrough in convenience is exclusive to the Hussey Concertina Stage.

No more back-breaking labor with a crew setting up traditional frame and panel staging for every event. One person can open and close the Concertina quickly, smoothly and easily — an enormous time and labor-cost savings. The stage is powered by a hand-held rechargeable battery pack that you can use anywhere, with no electrical set-up required.

The Concertina opens to a solid, non-slip platform, one that's ready to safely support all the people and

equipment your performance requires. Available in 18" (457 mm) and 24" (610 mm) heights and a variety of sizes, it works in concert with any budget. For strength, safety and quiet performance, the Concertina is simply the best. When closed, the stage folds into a tight envelope that makes storage a breeze. Our wall-attached version stores neatly in place, while our portable model can be rolled and stored anywhere throughout your facility.

For your added convenience, we provide optional barrier rails, sturdy steps, side skirting, and a customizable cover.

Built with a strong, safe understructure, the Concertina Stage exceeds industry code requirements and offers a firm, quiet performance.

Quick, Easy Set-Up Anywhere in Your Facility.

Set Up

Our Concertina Stage was designed to make any common space in your facility a potential performance space.

The portable version has an integral dual-caster dolly system, allowing two people to easily maneuver the Concertina Stage wherever you'd like to use it.

Power Up

The hand-held power pack runs on DC rechargeable batteries with a "smart charge" to ensure long battery life.

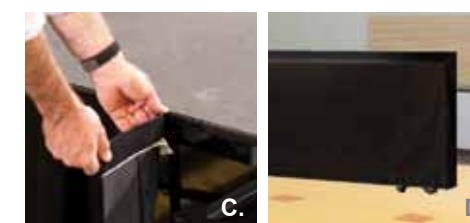

Since no permanent electric connection is required, you can set up and use your stage anywhere in your facility.

Accessories

We have all the accessory options you'd expect in a professional stage solution:

- A. Easy-to-install barrier rails
- B. Safe, sturdy steps that roll into place and fold for easy storage
- C. Side skirting with Velcro attachments
- D. Protective cover for use in the closed position that can be customized with logos or artwork

Concertina Stage™

Hussey Seating Company™

The Hussey Seating Company story dates back to 1835 with William Hussey's tremendously successful plow design, and thus, the Hussey Plow Company was born. As times changed over the next sixty years, the family set about reinventing the business, evolving into the company that is now seating the world. Today, under the sixth generation of family leadership, Hussey Seating Company is proud to be known as the leading manufacturer of seating solutions throughout the world – in stadiums, arenas, schools, universities, colleges, places of worship and anywhere people gather.

Hussey. Your partner for seating solutions.
